

Hyarchis.Net provides De Hypotheker with more than 85 percent improvement in efficiency

Waalre, 27 March 2007 – De Hypotheker in Zoetermeer is the first franchise of De Hypotheker Associatie to have implemented Hyarchis.Net and is now delivering its documents and files digitally to the central organization.

With the Document Management functionality of Hyarchis.Net, the organization is now accelerating and simplifying the processing of mortgage files by making them paper-free.

The advantages of Hyarchis.Net are immediately evident. The scanning and processing of a mortgage file with fourteen separate sections used to take fifteen minutes; now it is completed in just two. This produces an efficiency improvement of more than 85 percent. De Hypothekers Associatie can now immediately scan all policies and make them available in real-time to all its offices. In this way the system shortens the internal lines between the Hypothekers Associatie umbrella organization and all the local offices of De Hypotheker.

It only took a few days for the organization to implement Hyarchis.Net. “Through the efforts of our own IT department and the collaboration with VDD IQware, we managed to achieve an extremely short implementation time,” says Dirk Smit, franchisee of De Hypotheker in Zoetermeer. “Hyarchis.Net has met the strong demands and high expectations we had for it in full. The extensive and integrated scanning possibilities are vital for us, and Hyarchis.Net provides them seamlessly. The intuitive interface makes it especially easy to use, and so our employees are equally enthusiastic about Hyarchis.Net.”

Following its successful introduction in Zoetermeer, all the more than 140 offices of De Hypothekers Associatie will eventually be implementing Hyarchis.Net.

About De Hypothekers Associatie

De Hypothekers Associatie (The Mortgage Providers Association) is the umbrella organization to which all offices of De Hypotheker (The Mortgage Provider) are associated. More than 140 offices of De Hypotheker throughout the Netherlands provide independent advice about all the available types of mortgage and their associated insurance policies, and then take care of

arranging quotations and finalizing contracts. The organization plays a leading role in this rapidly growing market and generates mortgage arrangements valued at billions of euros each year. In addition to mortgage advice, in many branches customers can receive a complete financial plan to match their personal situation. The Financial Coach from De Hypotheker provides advice about all financial matters that follow naturally from the mortgage. More information can be found at: www.hypotheker.nl.

About VDD IQware

VDD IQware has been developing and marketing software for the digital storage and processing of documents since 1990 that enable organizations to improve their quality and productivity. Hyarchis.Net is the Enterprise Content Management system that VDD IQware has developed on the basis of Microsoft.Net. It offers an extensive range of functionalities, together with great scalability and robustness. The implementation of Hyarchis.Net as a business-critical application in knowledge-intensive organizations results in significant added value and a remarkably short cost recovery time.
